EXERCISE PROGRAM

PURPOSE  To identify an exercise program provided to offenders at each facility.

POLICY  Each facility provides offenders with opportunities and equipment for physical exercise. Offenders are offered out of cell exercise involving large-muscle activity a minimum of one hour a day, three days a week. This applies to offenders in all custody classes unless their out of cell recreation privileges are restricted due to disciplinary problems (see Administrative Segregation Plan, Section III, C, 1.). Offenders who are required to stay in their cells for whatever reason can request a copy of the in-cell exercise program from the facility recreation department (see AD 07.33, Section III, C.). Offenders who are transient or in lockdown may be exempted for no longer than a week.
