

GUARDIAN INTEGRATED MEDICAL SYSTEM UPDATE

DECEMBER 2025

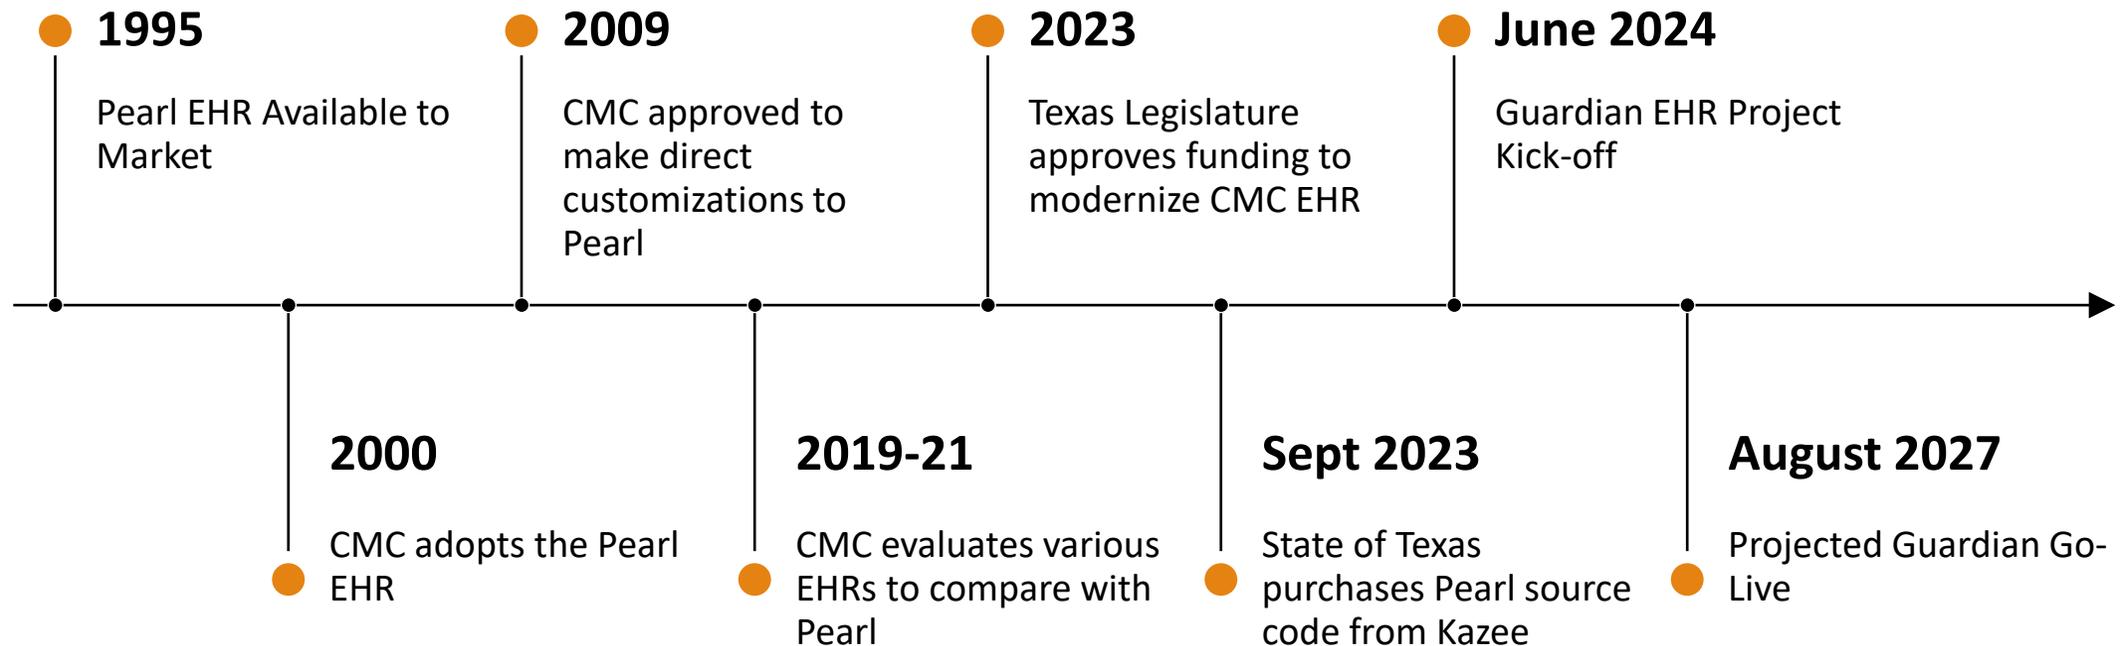

MELANIE ROBERTS, PHARMD, MBA
TOBY BOYETT, MHA, CHCIO, FHIMSS

Agenda

- Rationale for the Guardian Project
- Customizable Guardian EHR
- Future of Guardian EHR
- Leveraging Securus Technology

Reason for Guardian Project: Key Timeline

Customizable Guardian EHR

Key Points:

1. CMC understood that modernizing Pearl was the most fiscally sound approach.
2. Flexibility: Guardian EHR vs. Other EHRs (\$)
3. Greater Useability and Auditability for Stakeholders
4. CMC can continue “Correctionalizing” Guardian to meet the evolving needs of TDCJ and CMC.

Future of Guardian EHR

Key Points:

1. Guardian EHR is being built with the future in mind.
2. Will embrace appropriate AI applications
3. Allow for the leveraging of IT resources between the three agencies

Leveraging Securus Technology

Key Points:

1. CMC has engaged Securus to provide a Health Services App on the inmate tablets.
2. The first phase of the project involves providing on demand health education resources.
3. Phase two involves the roll out of electronic sick call submissions.
4. Anticipated benefits include:
 - a) timely access to care
 - b) reduced administrative burden and improved efficiency
 - c) enhanced health literacy
 - d) improved outcomes
