

Maintenance Supervisor Positions

The Maintenance Department maintains all TDCJ owned and operated facilities. A unit maintenance office is located on each correctional facility. Each office has a technical staff, which varies according to the mission and facility offender population. There are six (6) region maintenance offices supporting the unit maintenance offices. These regional offices have specialty crews performing construction projects, repairs and renovations. The asbestos team provides asbestos abatement services to the TDCJ. The headquarters staff is responsible for overseeing the entire facility maintenance and repair process for TDCJ.
