In situations where temporary structures have been erected (e.g., tents) the auditor should use their discretion to determine whether to include the structure in the overall count of buildings. As a general rule, if a temporary structure is regularly or routinely used to hold or house residents, or if the temporary structure is used to house or support operational functions for more than a short period of time (e.g., an emergency situation), it should be included in the overall count of buildings.</p>	4
<p>Number of resident housing units:</p> <p>Enter 0 if the facility does not have discrete housing units. DOJ PREA Working Group FAQ on the definition of a housing unit: How is a "housing unit" defined for the purposes of the PREA Standards? The question has been raised in particular as it relates to facilities that have adjacent or interconnected units. The most common concept of a housing unit is architectural. The generally agreed-upon definition is a space that is enclosed by physical barriers accessed through one or more doors of various types, including commercial-grade swing doors, steel sliding doors, interlocking sally port doors, etc. In addition to the primary entrance and exit, additional doors are often included to meet life safety codes. The unit contains sleeping space, sanitary facilities (including toilets, lavatories, and showers), and a dayroom or leisure space in differing configurations. Many facilities are designed with modules or pods clustered around a control room. This multiple-pod design provides the facility with certain staff efficiencies and economies of scale. At the same time, the design affords the flexibility to separately house residents of differing security levels, or who are grouped by some other operational or service scheme. Generally, the control room is enclosed by security glass, and in some cases, this allows residents to see into neighboring pods. However, observation from one unit to another is usually limited by angled site lines. In some cases, the facility has prevented this entirely by installing one-way glass. Both the architectural design and functional use of these multiple pods indicate that they are managed as distinct housing units.</p>	14

Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The Prison Rape Elimination Act (PREA) re-certification audit for the Cen-Tex Alcoholic Rehabilitation Center (Cen-Tex ARC) in Temple, Texas was conducted on March 9 & 10, 2020, to determine the continued compliance of the Prison Rape Elimination Act Standards. The audit was conducted by Noelda Martinez, United States Department of Justice Prison Rape Elimination Act Certified Auditor. The previous PREA Audit was conducted by Debbie Unruh on March 22, 2017. The previous auditor completed the audit with 39 met standards. The facility contract was secured through Martinez Auditing Services, LLC. The contract described the specific work required according to the DOJ standards and PREA audit handbook to include the pre-audit, onsite audit, and post-audit.

The facility was provided with the pre-audit questionnaire and process map six to eight weeks prior to the audit. The facility was prepared by forwarding the information by email to the auditor as required. The facility included an email with instructions on retrieving the confidential information. The information received included the pre-audit questionnaire, supporting documentation and required PREA data. The PAQ and additional audit information was expedited in a timely manner allowing follow-up questions & additional documentation as needed.

Notice of Audit

The facility posted the notice of audit prior to the audit in both English and Spanish for residents to send confidential information or correspondence to the auditor. The auditor verified the process by email and during the onsite portion of the audit. Residents were provided with the opportunity to write the auditor in a confidential manner. The notices were posted throughout the facility to include visitation, housing areas, resident work areas, and offices. The auditor observed the notice of audit posted during the site review and through random resident interviews identifying the notice in both English and Spanish.

Correspondence

The residents at the facility were given the opportunity to write the auditor in a confidential manner marked as legal mail, if needed. The auditor did not receive resident correspondence from the facility. During the random resident interviews, the auditor asked the residents if they were aware of the Audit Notice with the auditor's information, and the random responses were "yes". During the site review, the auditor randomly asked residents if they could point out the auditors posted information to ensure it was made available. The information was posted for the resident population in the housing areas. The Executive Director stated that the residents were also notified in group classrooms of the upcoming audit. The auditor did not encounter any difficulties while completing any portion of the audit. The facility provided the auditor with unfettered access to areas requested by the auditor to include chemical, electrical and janitor closets. There was no pressure during the audit or prohibited access by the facility administration during the site review, the facility administration was transparent with policies, procedures, resident, and staff interviews.

Good communication was established and maintained throughout the duration of the audit with the Executive Director and facility staff.

Audit Methodology (Pre-Onsite Audit Phase)

The auditor utilized the Community Confinement paper audit instruments which included the pre-audit questionnaire, auditor compliance tool, instructions for PREA site review, interview protocols: agency head or designee, facility director or designee, PREA coordinator, specialized staff, random staff, and residents. The auditor also used the PREA auditor handbook for continued guidance, audit report template, process map and checklist of documents. The auditor contacted the Executive Director prior to the audit to discuss the audit process and offer any assistance needed. The auditor established a positive working relationship with the Executive Director and key facility staff engaging in a productive working atmosphere. The director was receptive and eager to engage in dialogue and discussions regarding the standards. It was explained to the Director and his staff about the importance to have unfettered access to all areas of the facility, to include file reviews of contractors, volunteers, and residents to include a variety of sensitive and confidential documentation and information referencing standard 115.401 (PREA Auditor Handbook pg. 32 & 37). The auditor explained the 30-day interim report, if corrective action was required and the 180-day corrective action timeframe, if needed. The auditor explained to the Executive Director the 45-day time frame for the submission of the final PREA report. The auditor also notified the Executive Director and staff of her responsibilities and expectations as an auditor and the agencies right to report any violation of the auditor's code of conduct to the PREA Resource Center. The Executive Director and auditor discussed information regarding the 90-day appeal process.

Litigation/Internet Search

The Executive Director was interviewed and stated that the facility was not under any litigation, DOJ involvement, and or federal consent decree. The auditor conducted an internet search regarding the CEN-TEX with the following website links and information.

<https://www.rehab.com/cen-tex-alcoholic-rehabilitation-center/5326120-r>

Point of Contact

Staff and resident interviews were conducted in an office with plenty of room and privacy for one on one interviews. During the audit planning and logistics phase, the auditor remained engaged with the Executive Director regarding audit process, expectations, and coordinated the logistics of the onsite portion of the audit. The auditor focused on multiple sources of information during the audit process applying audit planning & logistics, posting notice of the audit, reviewing facility policies, procedures, and supporting documentation.

 Random Sample of Residents

Site Observations:

Records of initial assessments and reassessments

Findings: Screening for risk of sexual victimization and abusiveness

115.241 (a) A.M-4.6 Screening for Risk of Sexual Victimization and Abusiveness: All residents shall be assessed during an intake screening and upon transfer to another facility for their risk of being sexually abused by other residents or sexually abusive toward other residents. The facility utilizes the Sexual Violence Assessment Tool/PREA-Prison Rape Elimination Assessment and is completed within 24 hours. The auditor interviewed staff responsible for conducting the risk screening and a random sample of residents. The auditor randomly and informally asked questions to staff and residents during the site review. The auditor reviewed 15 Resident Files/Records during the onsite portion of the audit for the PREA intake screening within 72 hours of admission, Victim status, Aggressor status, LGBTI, reassessments, warranted reassessments, and PREA information and or refresher information upon transfer. 2/15 resident files did not have the initial PREA intake screening conducted within 72 hours of admission.

The facility identified the discrepancy and discussed immediate corrective active measures to ensure the agency is compliant with the standard. The auditor notified the facility administrator regarding standard 115.241 (a) all residents shall be assessed during an intake screening and upon transfer to another facility for their risk of being sexually abused by other residents or sexually abusive toward other residents. The auditor explained the purpose of the standard was to ensure that the facility has identified those at heightened risk of being sexually victimized and those at heightened risk of being sexually abusive so that it can make housing and programming decisions with the goal being to use this information to prevent sexual abuse. PREA screening information should be used to inform agency or facility decisions regarding a particular inmate's housing unit, security level, and programming needs and interventions.

The auditor required the facility administration to re-train staff/counselors responsible for the risk screening process and ensure all staff thoroughly understands the process and procedure. The facility administration was required to provide the training signature log to the auditor within 30-days. The facility took proactive measures and implemented the training immediately for all staff/counselors responsible for the screening process. The auditor was provided with the training signature log of the responsible individuals required to conduct the training. The auditor required the facility administrator to monitor the process a duration of 30-days to ensure all screenings are initiated, completed, and reassessed. The facility administration completed the 30-day monitoring of risk screening with no further action required.

115.241 (b) A.M-4.6 Screening for Risk of Sexual Victimization and Abusiveness: Intake screening shall ordinarily take place within 72 hours of arrival at Cen-Tex. The number of residents entering the facility (either through intake or transfer) within the past 12 months (whose length of stay in the facility was for 72 hours or more) who were screened for risk of sexual victimization or risk of sexually abusing other residents within 72 hours of their entry into the facility: 400. The auditor interviewed staff responsible for conducting the risk screening and a random sample of residents.

115.241 (c) A.M-4.6 Screening for Risk of Sexual Victimization and Abusiveness: Such assessments shall be conducted using an objective screening instrument. The facility utilizes a PREA Assessment for the intake process and was also utilized for the reassessment within 30 days of intake. The auditor suggested a small modification of the form for clarification.

The intake screening shall consider, at a minimum, the following criteria to assess residents for risk of sexual victimization: the auditor reviewed the Sexual Harassment and Sexual Abuse Risk Assessment for all the required questions (initial assessment and 30-day follow up assessment). The auditor interviewed the staff responsible for the risk screening during the onsite portion of the audit.

115.241 (d) A.M-4.6 Screening for Risk of Sexual Victimization and Abusiveness: The intake screening shall consider, at a minimum, the following criteria to assess residents for risk of sexual victimization:

- (1) Whether the resident has a mental, physical, or developmental disability.
- (2) The age of the resident.
- (3) The physical build of the resident.
- (4) Whether the resident has previously been incarcerated.

- (7) Whether the resident is or is perceived to be gay, lesbian, bisexual, transgender, intersex, or gender nonconforming.

The auditor interviewed the staff responsible for the risk screening during the onsite portion of the audit.

115.241 (f) A.M-4.6 Screening for Risk of Sexual Victimization and Abusiveness: Within a set time period, not to exceed 30 days from the resident's arrival at Cen-Tex, Cen-Tex will reassess the resident's risk of victimization or abusiveness based upon any additional, relevant information received by Cen-Tex since the intake screening. The auditor conducted a documentation review of 15 Resident files/records. The auditor identified 2 of 15 resident files in which were a few days over the 30-day reassessment. The auditor discussed the identified discrepancy with the Executive Director and PREA Coordinator. The auditor and facility worked together towards a corrective action plan. The auditor reviewed standard 115.241 (f) describes that residents must be rescreened within 30 days of their arrival at the facility. The process is intended to uncover key information from the resident that will help with housing and program decisions. The auditor discussed with the facility administration the goal is to keep those individuals at substantial risk of victimization away from those at high risk of committing abuse. PREA screening information should be used to inform agency or facility decisions regarding a particular inmate's housing unit, security level, and programming needs and interventions.

The auditor required the Counselor's to be re-trained on the screening process to ensure the facility has adequate information upon which to make housing and programming decisions within the 30-day time frame. The auditor recommended for the facility administration to review inmate files to ensure assessments and reassessments are occurring in a timely manner and documented appropriately. The auditor recommended the facility administration to review and monitor the resident files to determine completion of the assessments and reassessments for a duration of 30-days.

The number of residents entering the facility (either through intake or transfer) within the past 12 months (whose length of stay in the facility was for 30 days or more) who were reassessed for their risk of sexual victimization or of being sexually abusive within 30 days after their arrival at the facility based upon any additional, relevant information received since intake: 400. The auditor interviewed the staff responsible for the risk screening and random sample of residents during the onsite portion of the audit.

115.241 (g) A.M-4.6 Screening for Risk of Sexual Victimization and Abusiveness: A resident's risk level shall be reassessed when warranted due to a referral, request, incident of sexual abuse, or receipt of additional information that bears on the resident's risk of sexual victimization or abusiveness. The auditor interviewed the staff responsible for the risk screening and random sample of residents during the onsite portion of the audit. The auditor reviewed records of residents who were reassessed during the onsite portion of the audit for compliance.

115.241 (h) A.M-4.6 Screening for Risk of Sexual Victimization and Abusiveness: Residents may not be disciplined for refusing to answer, or for not disclosing complete information in response to, questions asked pursuant to paragraphs (d)(1), (d)(7), (d)(8), or (d)(9) of this section. The auditor reviewed staff responsible for the risk screening and verified that residents would not be disciplined for failure to answer any questions on the risk assessment.

115.241 (i) A.M-4.6 Screening for Risk of Sexual Victimization and Abusiveness: Cen-Tex shall implement appropriate controls on the dissemination within Cen-Tex of responses to questions asked pursuant to this standard in order to ensure that sensitive information is not exploited to the resident's detriment by staff or other residents. The auditor interviewed the PREA coordinator and the staff responsible for the risk screening during the onsite portion of the audit.

Corrective Action: The auditor recommended the following corrective action for (a) & (f).

Finding: 115.241 (a): The auditor reviewed 15 Resident Files/Records during the onsite portion of the audit for the PREA intake screening within 72 hours of admission, Victim status, Aggressor status, LGBTI, reassessments, warranted reassessments, and PREA information and or refresher information upon transfer. 2/15 resident files did not have the initial PREA intake screening conducted within 72 hours of admission. The facility identified the discrepancy and discussed immediate corrective active measures to ensure the agency is compliant with the standard.

Corrective Action: The auditor notified the facility administrator regarding standard 115.241 (a) all residents shall be assessed during an intake screening and upon transfer to another facility for their risk of being sexually abused by other residents or sexually abusive toward other residents. The auditor explained the purpose of the standard was to ensure that the facility has identified those at heightened risk of being sexually victimized and those at heightened risk of being sexually abusive so that it can make housing and programming decisions with the goal being to use this information to prevent sexual abuse. PREA screening information should be used to inform agency or facility decisions regarding a particular inmate's housing unit, security level, and programming needs and interventions.

The auditor required the facility administration to re-train staff/counselors responsible for the risk screening process and ensure all staff thoroughly understands the process and procedure. The facility administration was required to provide the training signature log to the auditor within 30-days. The facility took proactive measures and implemented the training immediately for all staff/counselors responsible for the screening process. The auditor was provided with the training signature log of the responsible individuals required to conduct the training. The auditor required the facility administrator to monitor the process a duration of 30-days to ensure all screenings are initiated, completed, and reassessed. The facility administration completed the 30-day monitoring of risk screening with no further action required.

Finding: 115.241 (f) The auditor conducted a documentation review of 15 Resident files/records. The auditor identified 2 of 15 resident files in which were a few days over the 30-day reassessment. The auditor discussed the identified discrepancy with the Executive Director and PREA Coordinator.

Corrective Action: The auditor and facility worked together towards a corrective action plan. The auditor reviewed standard 115.241 (f) describes that residents must be rescreened within 30 days of their arrival at the facility. The process is intended to uncover key information from the resident that will help with housing and program decisions.

The auditor discussed with the facility administration the goal is to keep those individuals at substantial risk of victimization away from those at high risk of committing abuse. PREA screening information should be used to inform agency or facility decisions regarding a particular inmate's housing unit, security level, and programming needs and interventions.

The auditor required the Counselor's to be re-trained on the screening process to ensure the facility has adequate information upon which to make housing and programming decisions within the 30-day time frame. The auditor recommended for the facility administration to review inmate files to ensure assessments and reassessments are occurring in a timely manner and documented appropriately. The auditor recommended the facility administration to review and monitor the resident files to determine completion of the assessments and reassessments for a duration of 30-days. The facility administration implemented and completed all portions of the corrective plan with no further action required.
