Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The Prison Rape Elimination Act (PREA) re-certification audit for the Huntsville Unit, Texas Department of Criminal Justice (TDCJ) in Huntsville, Texas was conducted on April 17-19, 2019, to determine the continued compliance of the Prison Rape Elimination Act Standards. The audit was conducted by Noelda Martinez, United States Department of Justice Prison Rape Elimination Act Certified Auditor. The auditor conducted the audit through a third-party entity as a contractor and is personally accountable for complying with the DOJ certification requirements and audit findings.

The first PREA Audit was conducted by PREA auditor James Curington on April 13-15, 2016. The previous auditor conducted the audit as a complex with six exceed standards, met 34 standards, and three not-applicable. The agency contract was secured through a third-party entity, PREA Auditors of America and not directly by the auditor herself. The contract described the specific work required according to the DOJ standards and PREA audit handbook to include the pre-audit, onsite audit and post-audit. The third-party contract was signed by the auditor on September 3, 2018. The third-party contract assigns the auditors after the contract was contractor executed and clearly identifies the lead auditors responsibilities.

The facility was provided with the pre-audit questionnaire and process map six to eight weeks prior. The agency was prepared prior to receiving the audit information by mailing the USB-drive by FedEx to the auditor on 2/26/19. The agency included an email with a tracking number and instructions on retrieving the confidential information and return of the USB-drive after the 15-month retention period. The auditor received the USB-drive within 2-3 days which included the pre-audit questionnaire, supporting documentation and master folder. The PAQ and additional audit information was expedited in a timely manner allowing follow-up questions & additional documentation as needed. The facility posted the notice of audit with the auditor information six to eight weeks 2/26/19 prior to the audit in both English and Spanish for offenders to send confidential information or correspondence to the auditor. Offenders are allowed to write the auditor in a confidential manner marked as legal mail. The notices were posted throughout the facility to include visitation, housing units, restrictive housing, to include lower signs for offenders with disabilities. The auditor verified the audit notice on 4/17/19 during the onsite site review and through random offender interviews. The audit notice was observed by the auditor in the front lobby, visitation, entrance, education, food service, laundry, and housing units including West building, East building, craft shop, death house, law library, five building, maintenance shop, mechanic shop, textile mill, tractor shop, supply, welding shop, back gate, inside/outside maintenance, and trusty camp.

The auditor did not encounter any difficulties while completing any portion of the audit. The facility provided the auditor with unfettered access to areas requested by the auditor to include chemical, electrical and janitor closets. There was no pressure during the audit or prohibited access by the facility administration during the tour, the facility administration was transparent with policies, procedures, offender and staff interviews. The staff encountered by the auditor were eager to assist and provide any information requested by the auditor with no hesitation. Good communication was maintained throughout the duration of the audit with the Senior Warden, Regional PREA Manager, Major and USPPM to include multiple departments heads and additional staff.

Audit Methodology (Pre-Onsite Audit Phase):

The auditor utilized the paper audit instruments which included the pre-audit questionnaire, auditor compliance tool, instructions for PREA audit tour, interview protocols: agency head or designee, warden or designee, PREA compliance manager/contractor, specialized staff, random staff and offenders. The auditor also used the PREA auditor handbook for continued guidance, audit report template, process map and checklist of documents. The Senior Warden contacted the auditor prior to the audit to offer any assistance needed by the facility. The auditor established a positive working relationship with the Senior Warden and key facility staff engaging in a productive working atmosphere. The Senior Warden was exceptionally receptive and eager to engage in dialogue and discussions regarding the standards. It was explained to the Warden and his staff about the importance to have unfettered access to all areas of the facility, file review of personnel contractors, volunteers, and offenders to include a variety of sensitive and confidential documentation and information referencing standard 115.401 (*PREA Auditor Handbook pg. 32 & 37*). The warden understood the importance of the audit process and review and with no hesitation provided access to the auditor. The auditor explained the 30-day interim report if corrective action was required and the 180-day corrective action timeframe, if needed. The auditor explained to the warden the 45-day time frame for the submission of the final PREA report. The auditor also notified the Warden and staff of her responsibilities and expectations as an auditor and the agencies right to report any violation of the auditors code of conduct to the PREA Resource Center. The warden and auditor discussed information regarding the 90-day appeal process.

Point of Contact:

A point of contact (*POC*) was established with the facility prior to the audit and constant communication was maintained. The auditor and warden discussed the location for interviews and decided that the staff and inmate interviews would be conducted in the committee room with plenty of room and privacy. During the audit planning and logistics phase, the auditor remained engaged with the warden, unit PREA manager, and regional PREA manager regarding the audit process, expectations, and coordinated the logistics of the onsite portion of the audit. The auditor provided the Warden with the PREA audit memorandum (*PAM*) which described in detail the audit process & initial meeting with key staff. The memorandum also discussed the transportation, daily schedule, work space, adequate outlets, permissible technology (laptop, cell phone) and other necessary audit materials and information required.

The auditor focused on multiple sources of information during the audit process applying audit planning & logistics, posting notice of the audit, reviewing facility policies, procedures, supporting documentation and conducting outreach to advocacy organizations.

Outreach/Community Based Victim Services:

The auditor reached out to the Texas Association Against Sexual Assault (La Asociacion de Texas Contra el Asalto Sexual) and spoke to a victim's advocacy representative organization prior to the onsite audit to learn about the issues of sexual safety and related concerns. The auditor followed up on any issues or concerns voiced by offenders or staff in a confidential manner during the audit review process. Facility Characteristics

The auditor's description of the audited facility should include details about the facility type, demographics and size of the offender, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

The Huntsville Unit is located 160 miles southeast of Dallas and 70 miles north of Houston, at 815 12th Street Huntsville, Texas, near downtown, in Walker County. The population of Walker County is approximately 67,861 residents. The Huntsville Unit operates under the Texas Department of Criminal Justice and is the oldest facility in the TDCJ system, having opened in October 1849. While the prison is officially called the Huntsville Unit, the prison's solid red brick wall around the entire facility led to the nickname "Walls Unit." TDCJ Region I offices are located in front of the unit. The Huntsville Unit is classified as an adult male maximum security level facility housing up to 1705 G1-G3 (G1 is the least restrictive) general population, administrative segregation, and transient offenders (transient – maximum security).

The Huntsville Unit serves as one of the largest TDCJ Regional Release Centers for male offenders (discharge, parole, mandatory supervision). Six Parole and Discharge staff is responsible for processing scheduled releases; and due to the volume of releases, three parole officers under the Texas Board of Pardons and Paroles are also located at the facility. Transient Offenders are processed for release or transfer to other facilities, hospital appointments, and specialty clinics at facilities within TDCJ Region I. Male prisoners who have detainers, are classified as sex offenders, have electronic monitoring imposed by the Texas Board of Pardons and Paroles, and/or have certain special conditions of the Super Intensive Supervision Program (SISP) are released from the Huntsville Unit regardless of their counties of conviction, residences, and/or approved release counties. The offender chain officers process offenders in and out of the facility Monday through Friday.

The Huntsville Unit is home to the states only death house for male and female offenders. Male death row offenders are housed at the Allan B. Polunsky Unit and female death row offenders are housed at the Mountain View Unit. Death row offenders are transferred to the Huntsville Unit death house the day of the execution and are held in one of the eight single holding cells. The execution chamber is a nine-foot by 12-foot room with turquoise walls and a gurney. Two adjacent rooms, which view into the execution room through glass windows, house two groups. One room is reserved for the family or families of the crime victim(s); the other is for the family of the condemned. In 1923 it was decided that all executions would be carried out by the state, rather than by counties.

The Huntsville Unit has a collaborative relationship with the University of Texas Medical Branch (UTMB) who provides managed health care, and the Windham School District who provides educational services. Three assigned re-entry coordinators help offenders obtain their social security card, birth certificate, DD-214, and Texas photo I.D. card prior to being released. Officers from the Division of Parole provide releasing offenders with information on the rules of parole and what will be expected of them while under supervision.

3. Logbooks (unannounced round signatures)

Findings:

115.13 (a) The TDCJ Safe Prisons/PREA Plan (dated 3/18) addresses the standard: Supervision and Monitoring The supervision of offender will be conducted by supervisors at each unit shall conduct and document unannounced rounds to identify and deter sexual abuse and sexual harassment. Security staffing: each unit is required to develop, document, and comply with a staffing plan that provides adequate levels of staffing and, where applicable, video monitoring, to protect offenders against sexual abuse and take into consideration all relevant factors.

115.13 (b) The staffing plans were reviewed to include the staffing plan review minutes by the auditor. The Huntsville Unit staffing plan was reviewed prior to the onsite audit.

115.13 (c) The staffing plan provides adequate staffing levels, video monitoring to protect offenders against sexual abuse.

115.13 (d) Intermediate and Upper-level Supervisors are conducting unannounced rounds on all shifts daily to include night shift with no patterns identified. This determination is based on the staffing plan reviews, staffing rosters, interviews conducted with facility intermediate staff or higher-level staff who conduct unannounced rounds to identify and deter staff sexual abuse and sexual harassment. The auditor reviewed the documentation of unannounced rounds covering day and night shifts at different times. The supervisors interviewed during the audit articulated the process proceeding the responsibility of addressing issues on alerting staff regarding unannounced rounds. The staffing plan reviewed was comprehensive of the number and placement of staff and amount of video technology (where applicable) that is necessary to ensure the sexual safety of the offender population to include the facility layout and characteristics, classifications of offenders, and unique security needs and programming. The staffing plan was reviewed for the normal and expected operational conditions that can affect staffing shortages. The facility is making their “best efforts to comply on a regular basis” with the staffing plan. The auditor concluded that the facility complies with the standard for the relevant recertification period.

Corrective Action: The auditor recommends no corrective action.

The shower area has two doors upon entry, there is a sign that reads, Shower door to remain locked when not in use, and upon opening the door, there is another wall preventing any view inside the shower area. There was one area in the laundry department observed by the auditor walking up to the laundry storage area upstairs. Findings:

115.15 (a) The Safe Prisons/PREA Plan (dated 3/18) addresses the Cross-Gender Viewing and Searches. Correctional officers shall make the best efforts to allow offenders to shower, perform bodily functions, and change clothing without staff of the opposite gender viewing their breasts, buttocks, or genitalia, except in exigent circumstances or when such viewing is incidental to routine checks.

115.15 (b) The facility does not house female inmates.

115.15 (c) There have been no cross-gender strip searches and cross-gender visual body cavity searches in the past 12 months. Staff of the opposite gender shall announce their presence when entering an offender housing area in accordance with applicable post orders. Under no circumstances shall an offender search be conducted solely for the purpose of determining an offender's genital status. During the site review the auditor observed staff of the opposite gender conduct the "knock and announce," by saying "female on the floor" when entering the offender housing areas. The Regional PREA Managers provide training for each facility and the USPPM are required to disseminate the training on the facility. The shift supervisors conduct training on PREA related standards to include cross-gender Searches and viewing during shift briefing. The Huntsville Unit did not house intersex offenders in the past 12 months.

115.15 (d) The facility has implemented policies and procedures that enable inmates to shower, perform bodily functions, and change clothing without non-medical staff of the opposite gender viewing their breasts, buttocks, or genitalia, except in exigent circumstances or when such viewing is incidental to routine cell checks. The auditor observed the video cameras for this practice. A random sample of staff and inmate interviews determined that the inmates have privacy when they shower, change, and use the restroom.

115.15 (e) The facility policy prohibits staff from searching or physically examining a transgender or intersex inmate for the sole purpose of determining the inmates genital status.

Random staff interviewed described the policy and procedure prohibiting these type of searches. There were no transgender or intersex inmates during the onsite portion of the audit for interviews.

115.15 (f) The CTSD training curriculum addresses the cross-gender viewing & searches. The auditor reviewed the documentation of exigent circumstances with none conducted for the audit cycle. All offenders interviewed clearly described their ability to shower, change clothes, and use the toilet without the opposite-gender staff viewing them. The offender interviews indicated staff of the opposite gender make an announcement prior to entering the housing unit for privacy reasons.

Corrective Action: The auditor recommended the following corrective action. During the site review on 4/17/19, the auditor observed the following areas of concern which were discussed with the Warden and staff in these specific departments. The auditors objective is to explain, educate and work in conjunction with the facility to ensure all PREA standards are followed. The facility Administration was very transparent and eager meet very provision of the standard. The Warden and PREA staff were extremely opened minded and willing to move forward with any corrective action necessary to meet all elements of the standards. They displayed integrity, honesty, and a positive attitude as a team. The Food Service commissary was observed during the site review. The auditor observed the stacking of the boxes higher than normal creating a possible blind spot. The Food Service manager in conjunction with the Warden and PREA manager immediately acted on the observation. The Food Service department made it a priority and repositioned the boxes by restacking them lower and closer to prevent to the wall to prevent blind spots or hidden areas for the safety of staff and offenders.

The Administration decided to add a mirror on site in that specific area with the ability to view all staff and offender movement upon entering the area. The Food Service manager incorporated training with her staff to ensure all rules and regulations were followed. During the site review of the laundry department the auditor walked up a stairwell to the necessity area and noticed a window to the left-hand side. There was a small window, the auditor looked inside and noticed the view was directly into the male shower area. The Laundry supervisor and PREA manager immediately had the window painted and covered for the prevention of cross-gender viewing and no access to incidental viewing into the male shower area. This issue was corrected immediately on 4/17/19. This area was not visible to any female staff unless they walked up to the necessity area and intentionally looked in through the small window. Once the necessity area was opened, the door immediately covered that specific area in question, however, the facility took proactive measures and permanently covered the area for no visibility. The auditor observed at least twenty-five closets throughout the site review and observed one closet with limited access that had no lighting and was no longer used by the Warden. The Warden immediately restricted the key access for no further use on 4/19/19. The Textile Industry department installed a total of four surveillance cameras in the following locations: (1) West-wall of Textile Mill-Maintenance gate and front yard camera, Embroidery South; (1) W-Wall Textile-Maintenance gate CMR- 25; (1) Textile Embroidery South Camera, Tool room CMR-45; (1) Textile Tool room camera CMR-44; and (1) 3rd Floor Stairwell Textile CMR-20. The auditor observed the area on 4/17/19 and observed a location on the second floor, at the back end of the Textile department that was very loud and could potentially become a blind-spot and area of concern with little to no visibility from the front entrance to the location. The auditor, Warden and Textile Industry supervisor discussed the isolated area with minimum visibility and determined that a security mirror would be the best option for this particular area. The Textile industry supervisor interview determined that he had already identified these issues during a staffing committee and was working on obtaining more surveillance cameras prior to the audit. The Textile supervisor and Warden were already working on obtaining more cameras for staff and offender safety. The Security mirror was ordered and will be installed upon arrival. A follow-up with facility on May 21-22, 2019 confirmed the final corrective action process of adding eight security mirrors in all areas of the Textile second floor of the industry. The facility placed half-dome safety mirrors, and convex security mirrors to help prevent blind spots to provide a safe and secure work environment. The security mirrors were put in place to alert personnel of danger, assist offices where blind intersections and corners exist and at front desk/office locations where individuals need to view normally blocked access areas. The facility acted on every issue and concern brought forth by the auditor during the site review and took great initiative in meeting the provisions of the standards for the offender and staff population.
