

Spring Forward Safety Tip Checklist

As we set the clocks forward and adjust to the new time change, now is a good time to check items in your home that may need attention!

- If clocks are battery powered, change the batteries.**
- Safety experts recommend replacing smoke and carbon monoxide detector batteries twice per year.**
- Fire extinguishers can become useless over time so now is the time to test and replace it. If you don't have a fire extinguisher you should get one in your home.**
- Consider replacing conventional bulbs with energy-efficient or LED bulbs. Energy-efficient bulbs can save you over \$30 in electricity cost over their lifetime.**
- Check your first-aid kits and replace any missing supplies.**
- Check under sinks, toilets, in the basement, behind your washer, shower/tub, and other household plumbing to make sure that you don't have a small leak.**
- Review your homeowner's insurance policy to ensure that you have all the coverage you need to protect you, your family and your belongings. It is important to know what your policies cover and do not cover.**
